### Region spared in swine flu increase

Birmingham Post (Birmingham); Jun 3, 2009; p. 18

Full Text:  
(Copyright 2009 Birmingham Post and Mail Ltd.)

One extra case of **swine flu** has been recorded in the West Midlands of a child connected to virus-hit Eton School.

But the reprieve in cases in the region came as England had its worst day yet since the **flu** outbreak began with 61 extra cases confirmed - the largest number announced in one day.

There are 295 confirmed cases in England, including 91 in the West Midlands, 65 in Scotland and one each in Wales and Northern Ireland.

Two people have been admitted to intensive care with the H1N1 virus and the pair - a 45-year-old man and a 38-year-old woman - are being treated at the Royal Alexandra Hospital in Paisley, Renfrewshire. But there was some relief for teachers at Welford Primary School, in Handsworth, last night with no new cases reported by the Health Protection Agency (HPA) after days of cases continuing to rise.
